

I strongly oppose the use of public airwaves for a private corporate agenda. Sinclair Broadcasting is doing just such a maneuver. It is unethical to require their stations to run a biased program such as the anti-Kerry piece in the coming days. Media near-monopolies such as Sinclair may benefit from such biased programming by affecting the coming election to favor the candidate that offers them the most freedom and latitude for their bottom line. Don't let them do it!

Sincerely,
Blake Rowe
